

Obsolescence Report for Sirius 3RT1026-1BB44

Lifecycle Information

Field	Value
Product Reference	Sirius 3RT1026-1BB44
Manufacturer	Siemens
Product Type	Contacteur
End of Life Date	
Is Supported?	No
Data Reliability	80%

Product Description

Power contactor, AC-3 25 A, 11 kW / 400 V 24 V DC, 2 NO + 2 NC 3-pole, Size S0 Screw

Obsolescence Details

Field	Value
Risk Level	Medium

Recommendation

Identify and stockpile alternative components or successors.

Impact Analysis

The obsolescence of the Sirius 3RT1026-1BB44 contactor could lead to moderate disruptions in production and maintenance schedules. As a contactor, it is less critical than programmable components like PLCs, but its failure can still halt operations if replacements are not readily available. The lack of current support and the absence of an end-of-life date increase the risk of unexpected downtime.

Alternative Solutions

Consider using the successor model 3RT2026-1BB44 as an alternative. Evaluate compatibility and performance to ensure seamless integration.
